

Price of construction cable tray supports

AI Overview

Cable tray supports, such as trapeze brackets and mounting hardware, typically account for 20–30% of the total cable tray system cost, with individual supports ranging from \$10 to \$50 or more depending on type and material.

Typical Support Costs

Cable tray supports are essential for securely suspending trays and ladders. Prices vary based on design, material, and size:

- Trapeze brackets: Prefabricated supports like the 600mm double tier trapeze bracket are designed for trays up to 600mm wide and can cost around \$50 per unit, including pre-assembly for faster installation .
- Standard brackets and hangers: For smaller or simpler installations, supports may cost \$10–\$30 per piece, depending on material (steel, galvanized, or aluminum) and load capacity .
- Bulk or trade pricing: Large construction projects often receive discounts for bulk orders, which can reduce per-unit costs significantly .

Factors Affecting Support Pricing

- Material: Steel supports are generally more affordable, while stainless steel or aluminum supports are more expensive due to corrosion resistance and durability .
- Installation complexity: Supports for high-level or outdoor installations may require longer rods, additional fasteners, or specialized coatings, increasing costs .
- Accessories: Nuts, washers, threaded rods, and other fasteners are often sold separately and can add 20–30% to the total support cost
