

# Price of disassembling a Somali optical splitter

## AI Overview

The cost of disassembling a Somali optical splitter typically ranges from \$20 to \$100, depending on the splitter type, labor rates, and service complexity.

### Factors Affecting Cost

- Type of Splitter
  - PLC (Planar Lightwave Circuit) splitters are more precise and compact, often used for larger split counts (1x16, 1x32, 1x64), and may require careful handling during disassembly, increasing labor costs .
  - FBT (Fused Biconical Taper) splitters are simpler and used for smaller splits (1x2, 1x4), making them easier and cheaper to disassemble .
- Labor and Technical Expertise
  - Disassembly requires skilled technicians familiar with fiber splicing and handling to avoid damage. In Somalia, labor costs for specialized telecom services can vary widely depending on location and availability of trained personnel.
  - Typical service fees for optical fiber maintenance or minor repairs in East Africa range from \$20 to \$50 per hour, with disassembly usually taking 1-2 hours for a single splitter.
- Additional Costs
  - If the splitter is part of a rack-mounted or LGX cassette system, extra care is needed, potentially increasing the cost.
  - Disposal or recycling of the fiber components may incur additional fees....
