

Price of double-sided cable tray supports

AI Overview

Double-sided cable tray supports typically range from \$50 to \$300 per unit, depending on material, size, and configuration.

Typical Support Options

- Prefabricated Trapeze Brackets
- Example: A 300mm double-tier trapeze bracket made from stainless steel (A316/A4) can support cable trays up to 300mm wide with a 500mm drop. These are ready-to-use, corrosion-resistant, and suitable for indoor and outdoor installations .
- Price: While exact pricing varies by supplier and quantity, stainless steel trapeze supports generally cost \$100–\$300 per unit, with bulk orders potentially reducing the per-unit cost.
- Modular Support Systems
- Companies like Oglaend System offer modular, pre-engineered support systems designed for industrial and offshore projects. These systems reduce installation time and total project cost through standardization and pre-cut modules .
- Price: Modular systems are more expensive upfront but can save up to 30% in total installed cost due to reduced labor and engineering hours. Individual support components may range from \$50–\$200 per piece, depending on material and configuration.

Factors Affecting Cost

- Material: Stainless steel is the most expensive, followed by hot-dip galvanized steel, aluminum, and pre-galvanized steel
