

Price of electrical distribution boxes for apartment buildings

AI Overview

Apartment electrical distribution boxes typically cost between \$1,000 and \$2,500 for standard residential setups, with higher-end or smart panels reaching \$3,000-\$6,000 including installation.

Cost Overview

The price of an apartment distribution box depends on several factors, including panel amperage, enclosure material, number of circuits, and whether it is a basic or smart system. Basic residential panels for 100-125A indoor use generally cost \$1,200-\$2,000 including labor and permits, while larger 200A outdoor upgrades with new meter sockets can reach \$3,000-\$6,000 .

Material and Features

- Enclosure material: Plastic boxes are cheaper, while steel or stainless steel enclosures are more durable and corrosion-resistant, increasing cost .
- Internal components: Adding high-quality circuit breakers, surge protectors, or busbars raises the price significantly .
- Smart features: Modern smart distribution boxes that allow energy monitoring and load management can cost double a traditional panel but may save money over time .
