

Price of irregular-shaped cable trays channel type

AI Overview

The price of irregular-shaped channel cable trays varies widely, typically ranging from \$20 to \$150 per foot depending on material, size, and customization.

Factors Affecting Price

- **Material:** Steel (galvanized or powder-coated) is common for heavy-duty applications and costs more than aluminum or fiberglass, which are lighter and corrosion-resistant . Stainless steel trays, often used in cleanrooms or washdown areas, are at the higher end of the price range .
- **Tray Type and Shape:** Irregular-shaped trays, including bends, tees, risers, or custom angles, increase cost due to additional fabrication and fittings . Standard straight channel trays are cheaper, while custom or perforated designs add to the price .
- **Size and Load Capacity:** Larger trays with higher load ratings for heavy power cables are more expensive. Typical dimensions for channel trays range from 2"x2" to 6"x6" or larger, with prices scaling accordingly .
- **Finish and Coating:** Hot-dip galvanized, powder-coated, or halogen-free finishes improve durability and corrosion resistance, affecting cost
