

Price of optical cable fastener clamps

AI Overview

Optical cable fastening clamps typically range from \$0.50 to \$10 per piece, depending on type, material, and supplier.

Price Overview

The cost of optical clamps varies widely based on material, design, and application. Basic fiber optic cable clips or small polymer clamps can cost as little as \$0.50-\$2 per unit, while more robust stainless steel or UV-resistant clamps designed for outdoor or FTTA (Fiber to the Antenna) installations may range from \$5 to \$10 or more per piece. Bulk purchases often reduce the per-unit cost, especially when ordering from manufacturers or suppliers like Alibaba or specialized telecom vendors.

Factors Affecting Price

- **Material:** Stainless steel and aerospace-grade alloys are more expensive than engineered polymers or aluminum due to durability and corrosion resistance.
- **Clamp Type:** FTTA clamps, hanger clamps, and tension control clamps designed for high-stress or outdoor environments cost more than simple indoor cable clips.
- **Cable Compatibility:** Clamps designed for micro-ducts, high fiber density, or larger diameter cables may have higher prices due to precision engineering.
- **Environmental Resistance:** UV-resistant, corrosion-resistant, or vibration-resistant clamps for outdoor telecom infrastructure are priced higher than standard indoor clamps.
- **Supplier and Quantity:** Prices vary by supplier, region, and order volume. Asia-Pacific suppliers, particularly in China, often offer lower prices for bulk orders
