

Price of two-tube connector for eight-core optical fiber cable

AI Overview

The price of a two-tube connector for an eight-core optical fiber cable typically ranges from \$15 to \$50 per connector, depending on type, fiber compatibility, and installation method.

Connector Types and Compatibility

For an eight-core optical fiber cable, you will generally use field-installable mechanical connectors or pre-terminated multi-fiber connectors. FASTConnect® connectors, for example, support single-mode and multimode fibers, including 250 μm and 900 μm fibers, and are compatible with LC, SC, and ST connector types . These connectors are designed for quick, tool-less termination and provide low-loss performance without hand polishing.

Factors Affecting Price

- Connector Type: LC connectors are smaller and often slightly more expensive than SC or ST connectors.
- Fiber Type: Single-mode connectors cost more than multimode due to tighter alignment requirements.
- Installation Method: Field-installable connectors are generally less expensive than factory pre-terminated assemblies but may require more labor.
- Quantity: Buying in bulk can reduce the per-unit cost by 20-40% .
