

Price range of multi-hole trough-type cable trays

AI Overview

Multi-hole trough-shaped cable trays typically range from \$15 to \$120 per meter, depending on material, size, and supplier.

Pricing Overview

The cost of trough-type cable trays varies widely based on material, dimensions, and customization. Common materials include stainless steel, galvanized steel, aluminum, and PVC, each affecting durability and price. For example, galvanized steel trays are generally more affordable, while stainless steel (304 or 316) options are premium due to corrosion resistance.

- Small, lightweight trays suitable for low-load applications can start around \$15-\$30 per meter.
- Medium-duty trays with standard perforations and moderate load capacity typically cost \$40-\$70 per meter.
- Heavy-duty or customized trays, including multi-hole designs for high cable density or industrial use, can reach \$80-\$120 per meter or more.

Factors Affecting Price

- Material: Stainless steel > Aluminum > Galvanized steel > PVC.
- Tray Width and Depth: Larger trays supporting more cables cost more.
- Perforation Pattern: Multi-hole or ventilated designs may increase manufacturing complexity....
