

Procurement of RoHS Spectrometer in Senegal

AI Overview

RoHS spectrometers can be procured in Senegal through certified laboratories, specialized suppliers, or public procurement channels, with compliance to EU RoHS standards.

RoHS Certification and Testing in Senegal

RoHS (Restriction of Hazardous Substances) compliance in Senegal is managed by specialized consultants and laboratories that provide testing and certification services for electrical and electronic products. Testing can be performed using XRF (X-ray fluorescence) analyzers, which are non-destructive spectrometers capable of screening metals, plastics, and other materials for restricted substances such as lead, mercury, cadmium, and hexavalent chromium. Senegalese facilities, such as those offered by ELCA, provide both screening and verification services, including lab-based phthalate solvent extraction and detailed analytical techniques to ensure compliance with RoHS standards (Directive 2002/95/EC) for products intended for the EU market .

Procurement Channels

1. Local Suppliers and Laboratories

- Laboratories offering RoHS testing often sell or lease XRF spectrometers and other analytical equipment. Partnering with these labs can provide access to certified instruments and technical support....
