

Requirements for Communication Power Supply Systems in Computer Rooms

Overview

1382 specifies requirements for the power supply mode of the three-layer architecture of telecommunication rooms. The research leading to these results has received funding from the European Community's Seventh Framework Programme (FP7/2007-2013) under grant agreement n° 238875, relating to the project 'Multi-Gigabit European Research and Education Network and Associated Services (GN3)'. The installation of. Let's explore an example of how rules within Chapter 6 modify the general requirements contained in chapters 1-4. These include the following (in. Recommendation ITU-T L. The work has been carried out by a UNINETT led working group on physical infrastructure as part of a joint-venture project within the HE sector in Norway. Deploy the power equipment near the telecom equipment to make the DC feeder as short as possible.
