

Road-mounted socket distribution box

AI Overview

A road-mounted socket distribution box is a pre-wired, wall- or surface-mounted power distribution unit designed for safe and efficient electrical supply in temporary or outdoor environments.

Overview

A road-mounted socket distribution box is used to distribute electrical power from a single supply line to multiple devices or tools, commonly on construction sites, events, or temporary installations. These boxes are designed for robustness, safety, and ease of installation, often featuring pre-wired connections, protective housings, and integrated circuit breakers or RCDs for overload and fault protection .

Key Features

- **Socket Types and Ratings:** Common configurations include 16 A and 32 A CEE 5-pin 400 V sockets for high-power equipment, and 13 A or 16 A Schuko/UK sockets for standard devices .
- **Pre-Wired and Ready to Use:** Most boxes come pre-wired, reducing installation time and minimizing errors. They often include N + PE terminal blocks and PG16 cable glands for secure cable entry .
- **Safety Components:** Integrated RCDs (residual current devices) and circuit breakers protect against overloads and electrical faults. These components are typically TÜV certified for compliance with European safety standards .
- **Housing and Protection:** Boxes are sealed to IP44 or IP54 standards, making them suitable for indoor and outdoor use. Some heavy-duty models offer IP67 protection,...
