

Routers that can be equipped with fiber optic modules

AI Overview

Not all routers include a fiber optic module; only fiber-ready routers or those with integrated SFP/SFP+ slots can connect directly to a fiber optic line.

Understanding Fiber-Ready Routers

Most standard routers do not have a built-in fiber optic module and require a separate Optical Network Terminal (ONT) or fiber modem provided by your ISP to convert the optical signal into Ethernet for the router to use . These routers connect to the ONT via a standard WAN port using an Ethernet cable. This setup is common in homes where the ISP provides the ONT as part of the fiber installation .

Routers with Integrated Fiber Modules

Some routers, often labeled as fiber optic routers, come with an integrated fiber optic module or a slot for SFP/SFP+ modules. These routers can connect directly to the fiber line without a separate ONT . For example, FRITZ!Box fiber routers like the 5590 Fiber or 5690 Pro include the necessary technology to handle GPON, AON, or XGS-PON fiber standards, allowing direct fiber connection .

SFP/SFP+ Modules

Routers with SFP or SFP+ slots require a compatible optical module to establish a fiber connection. These modules are often hot-swappable and support various fiber...
