

ST-ST Fiber Optic Coupler

AI Overview

An ST-ST fiber optic coupler is a device that connects two ST (Straight Tip) fiber optic cables, supporting reliable signal transmission in singlemode or multimode networks.

Overview

An ST-ST fiber optic coupler is designed to join two ST fiber optic connectors, typically in a duplex or simplex configuration, allowing optical signals to pass through with minimal loss. These couplers are widely used in telecom, data centers, LANs, FTTX, and industrial networks to extend or interconnect fiber optic cables efficiently .

Key Features

- Connector Type: ST (Straight Tip) with a bayonet-style coupling for secure and easy insertion .
- Duplex or Simplex: Duplex couplers support organized fiber routing and simultaneous bidirectional communication, while simplex couplers handle single-channel connections .
- Fiber Compatibility: Available for singlemode and multimode fibers, ensuring flexibility in network design .
- Alignment Sleeves: Couplers use bronze sleeves for multimode fibers and ceramic sleeves for singlemode or mixed applications, maintaining precise optical alignment .
- Polishing Types: Compatible with PC (Physical Contact) or UPC (Ultra Physical Contact) polished connectors, which reduce back reflection and signal loss .
- Construction Materials: Typically made from zinc alloy, nickel-plated metal, or plastic, with options for ceramic or stainless steel ferrules for durability and consist...
