

Safety Inspection of Aerial Optical Cable Construction

Overview

Routine Inspection: Regularly check for loose connections, wear, and cable integrity. The Fiber Optic Association, Inc. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. Failure to do so can result in life-threatening work on a ladder so that it cannot fall. Materials and equipment should not be used for in your company's safety procedures and, if necessary, lineman's rubber gloves.

Introduction This Program provides supervision, employees and safety managers with general safety rules, task safety procedures and best techniques for installation of quality fiber optic cable systems (cable handling, splicing, pulling, terminating testing and. J&J Line Services is committed to providing a safe working environment for all employees, subcontractors, and the public. Safety is not a priority that shifts — it is a core value embedded in every operation we perform. Every crew member has the authority and the obligation to stop work when. Determine the optimal cable route and assess environmental factors.
