

Setting up the secondary router for telecom fiber optic cables

Overview

Abstract: This article provides a step-by-step guide on how to connect two routers to an incoming fiber optic supply, with the intention of having telephone and broadband services, while also utilizing additional features from the replacement router such as the Fritzbox. Abstract: This article provides a step-by-step guide on how to connect two routers to an incoming fiber optic supply, with the intention of having telephone and broadband services, while also utilizing additional features from the replacement router such as the Fritzbox. A common solution is to connect two routers on the same fibre optic line. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience. The ISP does not. This kind of configuration makes it possible for the second router to be placed 'behind' the primary router, rather than finding two routers fighting for access to the modem. This solves the issue of having two NATs interact with each other, lets the main router handle what it needs to, and. Adding a second router is a great way to expand your network capacity, as well as the reach of your wireless signal in weak or "blackout" areas. Connect the modem to the first router. Why Use Fiber Optic Internet?

Before diving into the setup, let's quickly.
