

# Six Types of Cable Management Racks

## AI Overview

Cable management racks come in six main types: horizontal, vertical, brush panels, finger ducts, cable trays, and ring-type managers, each designed to organize, protect, and route cables efficiently in network and server racks.

### 1. Horizontal Cable Managers

Horizontal cable managers are installed between rack units to guide patch cords across the front of equipment. They often include plastic or metal rings, D-rings, or brush panels to prevent sagging, maintain uniform paths, and ensure proper bend-radius compliance for both copper and fiber cables .

### 2. Vertical Cable Managers

Vertical cable managers run along the sides of a 19-inch cabinet, providing dedicated channels for high-density environments. They help separate copper and fiber links, maintain consistent bend-radius control, and support large cable volumes without clutter .

### 3. Brush Panels

Brush panels are used at cable entry and exit points to reduce dust intrusion and provide strain relief. They allow cables to pass through while maintaining a clean front layout and protecting connectors from excessive bending .

### 4. Finger Ducts...
