

Slovenia Fire-Resistant Cable Tray Processing

AI Overview

Slovenia offers advanced fireproof cable tray solutions through specialized manufacturers and fire-resistant coatings, ensuring safe and compliant electrical installations.

Cable Tray Manufacturing and Processing

Slovenian companies like Bevec d.o.o. and Elba d.o.o. produce cable trays suitable for industrial, transport, and infrastructure applications. Trays are fabricated from galvanized steel, hot-dip galvanized steel, stainless steel, or aluminum, with widths ranging from 50 to 600 mm and heights from 50 to 60 mm . Advanced processing includes laser cutting, computer-guided bending, and powder coating, which enhances durability and corrosion resistance . Accessories such as bends, couplers, brackets, and hangers are available to facilitate complex installations .

Fire-Resistant Materials and Coatings

Fireproofing is achieved through specialized coatings and tapes. Products like FLAMMOTECT-A and DG-CR 0.7 provide a protective shield around cables and trays, preventing flame propagation and maintaining functionality during a fire . These coatings also improve resistance to UV radiation, moisture, chemicals, and saltwater, making them suitable for both indoor and outdoor installations .
