

Specifications and Models of Wall-Mounted Power Distribution Box

AI Overview

Wall-mounted power distribution boxes are compact enclosures designed for safe, space-efficient housing of electrical components, offering robust protection, modularity, and compliance with international standards.

Key Features and Specifications

1. Dimensions and Footprint Wall-mounted boxes are designed to optimize space while accommodating electrical components and wiring. Typical sizes range from 300×200×150 mm to 1200×800×300 mm, allowing flexibility for small to medium power distribution setups. The compact design ensures efficient thermal management and easy installation on vertical surfaces . 2. Material and Construction

- Materials: Cold-rolled steel, stainless steel, or heavy-duty metal for durability and corrosion resistance .
- Construction: Welded or die-cast structures provide mechanical rigidity and resistance to impact. Some enclosures feature PU foam gaskets and laser-welded seams to prevent micro-leakage .
- Surface Finish: Epoxy-polyester powder coating (RAL 7035) or structured finishes for enhanced protection and aesthetics . 3. Protection Ratings
- Ingress Protection: IP65 to IP66, ensuring dust-tight and water-resistant performance suitable for indoor and outdoor environments .
- Impact Resistance: IK10 rating for mechanical protection against external impacts .
- Temperature Range: Typically -40°C to +80°C, with short-term tolerance up to +7...
