

Standard power distribution box specifications and models in West Asia

AI Overview

Standard power distribution boxes in West Asia typically conform to IEC standards, with IP-rated enclosures for low-voltage applications ranging from 63A to 630A, suitable for residential, commercial, and industrial use.

Overview

Power distribution boxes in West Asia are designed to safely distribute electrical energy in low-voltage systems, typically 230/400V AC at 50 Hz, which aligns with international IEC 60038 standards. These boxes are used in homes, commercial buildings, and industrial facilities, and are available in single-phase or three-phase configurations depending on the application.

Types and Features

- Compact Distribution Boards (up to 63A)
- Used for residential and small commercial installations.
- Examples include ENYBOARD by Hensel, which is visually compact and safe for economical power supply.
- Modular and Combinable Boards (up to 250A or 630A)
- Suitable for industrial and large commercial applications.
- Systems like ENYSTAR and ENYMOD Mi allow customization and self-assembly, supporting power switchgear combinations (PSC) in accordance with IEC 61439-1 & 2
