

Swedish fiber optic tapered coupler manufacturer

Overview

The company develops and manufactures equipment used in optical fiber fusion splicing, including products for stripping and preparation, testing and analysing and fiber end-face inspection, but is most well known for its automated optical fiber recoating and fiber cleaving. The company develops and manufactures equipment used in optical fiber fusion splicing, including products for stripping and preparation, testing and analysing and fiber end-face inspection, but is most well known for its automated optical fiber recoating and fiber cleaving. Multi-axis positioner offering extremely high X and Z positional stiffness with minimal crosstalk in all axes and an impressive 5/6 Degrees of Freedom (DOF). A Singularity free design with no unachievable positions. End-to-end fiber optic solutions, ready to support your unique needs – from R&D to. Our tapered fibers are used in a wide range of applications: CeramOptec manufactures tapered core/cladding fibers and custom tapered fiber assemblies precisely to your requirements. Leveraging decades of expertise, advanced drawing and polishing technology, and rigorous quality control, we provide. MicroComp Nordic AB is a sales, product development and consultancy firm focused on microwave and fiber optics. We sell all types of microwave and fiber optic components and subsystems. Our knowledge and experience from some of the market's toughest customer specifications enables us to provide solutions for customers with high demands and specific needs.
