

Switch Optical Module Installation and Setup

AI Overview

To install an optical module in a switch, ensure proper ESD protection, align the module correctly, insert it gently until it clicks, and then connect the fiber optic cable.

Safety Precautions

- ESD Protection: Always wear a grounded anti-static wrist strap and work on an ESD-safe mat to prevent electrostatic discharge that can damage the module .
- Laser Safety: Never look directly into the optical module or fiber ends, as they emit laser radiation that can harm your eyes .
- Clean Environment: Work in a dust-free area and avoid touching the module's edge connector .

Step-by-Step Installation

- Power Off the Device: Ensure the switch or router is powered off to prevent electrical damage .
- Identify the Correct Slot: Locate the SFP, SFP+, or QSFP slot on your switch. Confirm the module type and fiber compatibility .
- Remove Dust Plugs: Take off the dust plug from the module slot and keep it for future use .
- Inspect the Module: Check the optical module for any visible damage or debris .
- Align the Module: Match the alignment key on the module with the keyway in the slot. SFP modules only fit one way .
- Insert the Module: Slide the module straight into the slot with firm, even pressure....
