

Syrian fiber optic cable for sale

AI Overview

Syria's fiber optic sector is driven by government-led projects like BARQ NET FTTP and SilkLink, alongside local manufacturers such as Syria Cables.

National Fiber-to-the-Premises (FTTP) Initiative

The BARQ NET FTTP project is Syria's nationwide fiber-to-the-premises infrastructure, covering all 14 governorates including Damascus, Aleppo, Homs, and Latakia. The Ministry of Communications and Information Technology (MoCT), regulated by the Syrian Telecommunications & Post Regulatory Authority (SYTPRA), invites qualified companies to deploy, operate, and maintain passive fiber infrastructure under a Virtual Unbundled Local Access (VULA) model. Selected network providers receive long-term licenses to offer wholesale access to ISPs, ensuring competition and customer choice. The project emphasizes high-quality fiber installation, environmental durability, centralized AI-based network monitoring, and cybersecurity measures for optimal performance .

SilkLink Project

The SilkLink project, launched in May 2025, is a major international collaboration led by Saudi Arabia's stc Group with a budget of approximately US\$800 million. It aims to establish over 4,500 kilometers of fiber-optic network, data centers, and a submarine cable landing station in Tartus. SilkLink connects major cities like Damascus and Aleppo, regional switching centers in Palmyra, and creates cross-border links with Jordan, Lebanon, and Turkey. The project positions Syria as a strategic digital corridor between Asia and Europe, reviving its historic role along the Silk Road and enhancin...
