

T-junction of 300 cable trays

AI Overview

A T-junction for 300 mm cable trays is a metal connector that allows three cable trays to join at a single point, ensuring secure and organized cable routing.

Overview

A T-junction, also called a T-piece, is used to connect three cable trays in a cable management system, forming a “T” shape. For a 300 mm wide tray, the T-junction typically accommodates the tray width and height, providing a stable and durable connection for electrical cables ().

Material and Durability

- **Material:** Usually made of galvanized metal, offering corrosion resistance and long-term durability ().
- **Durability:** Designed for various environments, including offices, warehouses, industrial areas, and locations with moderate to high humidity or airborne pollutants ().
- **Fire Resistance:** Many T-junctions comply with DIN 4102-12 (E30/E90) standards, ensuring fire safety during installation ().

Installation

- **Connection Method:** Cable trays are inserted into the T-junction at the connection points and secured with screws (typically 2 screws per side) ().
- **Adjustability:** Some models allow minor position adjustments during installation to...
