

Tanzania Cable Tray Operation Procedures

AI Overview

Cable tray operation in Tanzania requires adherence to approved installation methods, material inspection, proper handling, alignment, and strict safety protocols.

Material Handling and Inspection

Only approved and undamaged cable trays and accessories such as bends, tees, reducers, covers, supports, hangers, and bolts should be used for installation. Upon delivery, a QA/QC Engineer must inspect trays, fittings, and supports for physical damage, coating condition, and compliance with approved submittals. A Material Inspection Request (MIR) should be prepared and submitted for employer approval before installation. Trays and accessories must be free from dirt, oil, or corrosion before use .

Storage and Protection

Cable trays should be stored above ground in a dry, shaded area, protected from weather and construction activities. Components must be identified according to shop and certified CAD drawings to ensure proper routing and installation .

Installation Procedures

- Pre-Installation Preparation: Confirm availability of all approved documents, including material submittals, MIRs, shop drawings, ITPs, and method statements. E...
