

Telecom Fiber Optic Network Router Settings

AI Overview

To configure a fiber optic router for Telekom or similar ISPs, connect the router to the ONT, access the admin panel, input ISP credentials, update firmware, and secure your Wi-Fi network.

Physical Setup

- Install the Optical Network Terminal (ONT): Connect the fiber optic cable from the wall outlet to the ONT. Power it on and wait for the status lights to stabilize, usually 2-5 minutes .
- Connect the Router to the ONT: Use an Ethernet cable to link the ONT's LAN port to the router's WAN port. Ensure the router is powered on and indicator lights show active internet connectivity .

Accessing Router Settings

- Open a web browser on a device connected to the router.
- Enter the router's default IP address (commonly 192.168.1.1 or 192.168.0.1) in the address bar .
- Log in using the default credentials (often admin/admin unless changed during setup).

Configuration Steps

- WAN/Internet Settings: Input the ISP-provided credentials (username, password, and connection type) to establish internet access .
- Wi-Fi Settings: Set a strong SSID (network name) and password. Enable WPA3 or...
