

Temporary Distribution Box Configuration Introduction

Overview

It is used to safely and efficiently distribute the main power supply to multiple power consumption terminals in scenarios such as construction sites, large-scale events, and emergency rescue. Temporary power is easy to underestimate until something goes wrong. On a construction site, outdoor exhibition area, municipal repair project, or temporary industrial workspace, electricity is constantly moving with the job. Workers need power for tools, lighting, pumps, welding equipment, lifting. Indication Lights: These provide visual availability and status of mains power supply. Each component plays a specific role. Smart DB boxes have extra parts like energy monitoring units and communication modules. WIV DISTRIBUTION BOXES MAXIMUM FLEXIBILITY + MOBILITY. Maximum flexibility + mobility: With our pluggable WIV exhibition distribution boxes you are well placed to benefit.
