

The switch in the distribution box is lit with a red light

Overview

The red light warns you that the breaker turned off to protect your system. Overloaded outlets, broken wires, or bad devices might be the cause. But if it trips again, call an electrician. Seeing a red indicator light on a breaker can be alarming, but this light is a sophisticated diagnostic tool designed to communicate the exact nature of the electrical fault. Understanding what this light signifies is the first step toward safely restoring power and identifying the root problem in. A green light means everything is fine, but a red light means the breaker has tripped. If you see a yellow light, act fast. Some of my bathroom outlets do not work. This breaker is currently off, but when I turn it on, it shows a red light. Though this is the gist, there are multiple nuances in a circuit breaker blinking red. Aside from that, some circuit breakers also convey a red light. The red light inside the switch flickers, and the light that this switch is lighting also flickers. Do you have LED lights in your hallway?

Many older switches would run a small current through an old incandescent bulb to light a light like that, run a timer, X10 control.
