

Two broadband connections share one switch

Overview

Read on to learn how to set up two ISPs with 1 switch. Connect the WAN port in the 1st router to the 1st ISP. for example manually changing route on clients, using 2 subnets (but on dhcp on 1) etc etc. But if for an office then the above is the. So my question is it possible to have two ISP connected to one switch or any in the middle device like that would help me achieve this?

So when one internet connection is interrupted (because that happens sometimes with my current ISP) I'm not left without internet connection. Typically, it's done for fault tolerance. If a link falls, LAN is still connected to the outside world through other links and for improved bandwidth. In this scenario it would seems that. I want to connect two routers to a switch which will then be connected to a modem. So I bought two addresses at my ISP.

Can I connect two routers to one switch?

Yes, that is possible. You create 2 vlans on the switch. Lets say you create vlan 100 and 200, then add port,lets say 10 to vlan 100 and port 20 to vlan 200. Now you have one PC connected to port 10 and ...
