

UAE Optical Network Switch OSFP

AI Overview

OSFP switches in the UAE support ultra-high-speed networking up to 800G, ideal for data centers, AI, and HPC applications.

Overview of OSFP Technology

OSFP (Octal Small Form-factor Pluggable) is a high-speed optical transceiver standard designed for 400G to 800G data rates, supporting multi-lane connectivity and high-density deployments. OSFP modules are mechanically compliant with the OSFP Multi-Source Agreement (MSA) and are compatible with high-performance coherent optics for long-distance links, including 800ZR and 800G ZR+ applications . OSFP ports can also be used in breakout configurations, allowing a single high-speed port to serve multiple lower-speed connections, providing flexibility and future-proofing for network growth .

High-Performance OSFP Switches in the UAE

- **NVIDIA Quantum-X800 InfiniBand OSFP Switches**

- Throughput: 800 Gb/s per port, non-blocking switching capacity up to 115.2 Tb/s.
- Features: Ultra-low latency, RDMA support, adaptive routing, telemetry-based congestion control, self-healing, and NVIDIA SHARP for in-network computing .
- Applications: AI, HPC, and large-scale data center fabrics. Supports over 10,000 800 Gb/s host connections in a two-tier fat-tree topology.
- Availability: Sold through HPE UAE stores and other authorized distributors
