

UPS distribution box APD

AI Overview

APD offers UPS distribution boxes and lithium-ion UPS systems that provide reliable, compact, and high-capacity power management solutions for industrial, IT, and audio/video applications.

Overview of APD UPS Distribution Boxes

APD (Asian Power Devices) manufactures UPS systems and power distribution boxes designed to deliver stable and high-quality power. Their products are widely used in medical equipment, industrial automation, security monitoring, transportation, and IT infrastructure . APD's UPS distribution boxes are engineered to be compact, lightweight, and highly reliable, often incorporating lithium-ion batteries with advanced battery management systems (BMS) for safety and efficiency .

Key Features

- Lithium-ion battery technology: Offers longer life, higher temperature resistance, and reduced size compared to traditional lead-acid UPS systems .
- Compact design: APD's lithium-ion UPS units are up to 53% smaller than competitors, making them suitable for space-constrained environments .
- Multiple output options: Some APD distribution boxes, like the APD Power Distribution Adaptor (APD NP1), allow connection via XLR and Hirose sockets, supporting up to six NP batteries for high power output, ideal for audio/video carts or mobile setups .
- Advanced protection: Integrated SOH (State of Health) and SOC (State of Charge) monitoring ensures safe operation and optimal battery performance
