

Various cable trays for various uses and specifications

AI Overview

Cable trays are structured support systems for electrical and communication cables, available in multiple types, materials, and sizes to suit diverse industrial and commercial applications.

Types of Cable Trays

- Ladder Tray: Features two longitudinal side rails connected by cross rungs, allowing maximum airflow and heat dissipation. Ideal for heavy power cables and easy access for maintenance or future expansion .
- Perforated Tray: Solid bottom with perforations for ventilation, suitable for medium-weight cables and environments requiring moderate protection .
- Solid-Bottom Tray: Provides full support and protection, often used where moisture or dust accumulation is minimal; may trap moisture if not properly managed .
- Basket/Wire Mesh Tray: Made of welded steel wire, lightweight and flexible, ideal for light cables, telecommunication, and fiber optics .
- Channel Tray: U-shaped or C-shaped, used for short cable runs or aesthetic applications, sometimes with ventilated or solid bottoms .

Materials

- Aluminum: Lightweight, corrosion-resistant, suitable for most environments .
- Steel: Strong, provides electromagnetic shielding, available in pre-galvanized or hot-dip galvanized finishes for corrosion protection .
- Stainless Steel: Excellent corrosion resistance, withstands high temperatures, ide...
