

Wall-mounted cabinet for electrical distribution box

AI Overview

Wall-mounted electrical distribution boxes provide compact, secure, and space-efficient enclosures for power distribution and control components, suitable for indoor and outdoor installations.

Overview

A wall-mounted electrical distribution box is a compact enclosure affixed to vertical surfaces, designed to house circuit breakers, terminal blocks, PLC modules, meters, or other control and distribution equipment . Unlike floor-standing cabinets, wall-mounted boxes optimize floor space, improve accessibility, and allow localized control in industrial, commercial, or utility environments .

Materials and Construction

Wall-mounted boxes are typically made from stainless steel (304/316), mild steel, aluminum, or fiberglass-reinforced plastic (FRP) . Metal enclosures often feature galvanized steel mounting plates and powder-coated finishes (e.g., RAL 7035) for durability and corrosion resistance . High-quality enclosures include precision laser-welded seams and PU foam gaskets to ensure environmental protection .

Protection Standards

Protection ratings are critical for wall-mounted boxes:...
