

Wall-mounted lighting distribution box model

AI Overview

Wall-mounted lighting distribution boxes are compact, versatile units designed to safely distribute electrical power to multiple circuits, with models varying by material, circuit capacity, and protective features.

Key Specifications

Materials and Construction:

- Cabinets are typically made from premium steel (1.2mm) or metal powder-coated plates, while doors may use high-quality plastic for durability and safety .
- Some models, like flex7 boxes, use anodised aluminium for robustness and corrosion resistance .
- Protection levels vary: IP30-IP54, depending on indoor or damp area installation .

Circuit Capacity and Protection:

- Residential boxes often feature 6-12 circuits, including independent lighting circuits for living rooms, bedrooms, kitchens, and bathrooms .
- Commercial and industrial boxes can support 12-24 circuits, with options for dual power switching, timers, or light-controlled switches .
- Equipped with miniature circuit breakers (MCBs), residual current devices (RCDs), and sometimes surge protectors to prevent overload, short circuits, leakage, and lightning damage .
- Some models include molded case circuit breakers (MCCBs) for high-power applications . Installation Types:...
