

Waterproof plug-in fiber optic cable

AI Overview

Waterproof plug-in fiber optic cables are designed for reliable outdoor and industrial connectivity, featuring IP67 or IP68 ratings, rugged connectors, and plug-and-play installation for SC, LC, and MPO interfaces.

Key Features

Waterproof Ratings: These cables and connectors typically meet IP67 or IP68 standards, ensuring protection against dust and temporary or prolonged water immersion, making them suitable for outdoor, marine, and industrial environments .

Connector Types: Common interfaces include SC, Duplex LC (DLC), MPO, and Simplex SC/APC, allowing compatibility with standard indoor patch panels and network equipment .

Rugged Construction: Housings are made from high-strength polymers, stainless steel, or UV-resistant materials, often with rubber gaskets or silicone seals to prevent moisture ingress .

Cable Compatibility: Supports a range of cable diameters, including 3–7 mm round cables and 2–8 mm flat cables, with armored or TPU jackets for mechanical protection .

Durability: Designed for ≥ 500 mating cycles, withstanding temperature ranges from -40°C to $+85^{\circ}\text{C}$, vibration, and mechanical stress .

Installation: Many solutions are pre-terminated or field-terminable, allowing quick plug-and-play deployment. Some connectors feature screw-thread or bayonet locking mechanisms for secure mating .
