

What AI servers does Quanta Computer manufacture

Overview

Quanta wins contracts to build NVIDIA GB200-based AI servers for Google, Amazon AWS, Meta, and Microsoft. Will enter testing in July or August. Taiwan's Quanta Computer expects to begin production at a new Mexico facility in early 2025 as overwhelming demand for artificial intelligence servers forces the company to rapidly expand manufacturing beyond its traditional bases. Executive Vice President Yang Qi-ling said orders remain beyond the. TAIPEI (Taiwan News) – Quanta Computer Inc. achieved a record NT\$2 trillion (US\$63. 53 billion) in revenue last year by transforming itself from a laptop manufacturer to a provider of AI servers, reports said Saturday. According to a report from Economic Daily News (EDN), Meta has ordered up to 6,000 racks and plans to start deploying the AI servers, code-named Santa Barbara, by the end of 2025.
