

# What is the price of a dish-shaped optical cable connector

## AI Overview

The price of a dish-shaped optical cable connector typically ranges from \$5 to \$50 per unit, depending on type, polish, and supplier.

### Pricing Overview

Fiber optic connectors, including specialized types like dish-shaped or high-precision connectors, vary in price based on connector type, polish (UPC or APC), and application. Standard connectors such as SC, LC, ST, and FC usually cost \$5–\$15 per unit, while high-performance or field-installable connectors like Corning UniCam or MIL-SPEC types can range from \$20–\$50 per unit due to their precision ferrules and low insertion loss characteristics (Fiber Savvy, PHXFiber, Mouser) .

### Factors Affecting Price

- Connector Type: Multi-fiber connectors (MPO/MTP) or dish-shaped designs for high-density applications are generally more expensive than single-fiber connectors .
- Polish Type: APC (angled) connectors are costlier than UPC (flat) due to reduced return loss and higher precision .
- Durability and Application: Connectors designed for rugged or military environments (MIL-SPEC) command higher prices .
- Quantity and Supplier: Bulk orders reduce per-unit cost, while specialized connectors may require quotes from manufacturers like PHXFiber or distributors like Mouser ....
