

What is the white color of cable trays

Overview

This is an E-1 color code (formerly known as a K-1 code) because it includes both a white and green conductor. As a result, this tray cable may not work for every situation. Per NEC guidelines, white is meant to serve as the neutral conductor, while green is only used. Depending on which end of the cable you're looking at, you can read the colors clockwise or counterclockwise from the center black conductor. Let's say you cut your cable and see this series of colors: black, white, red, green, orange, and blue, in that order and in a consistent pattern. This is an. Special Safe-T-Edge: protects installers from sharp ends while it prevents cables from fraying. Wire mesh is smooth and round: to resist dirt and dust build-up. Large mesh size (2" wide by 4" long): allows cable installers to route cables in and. Plastic inserts create a smooth bottom for sensitive cable types in Cablofil cable management. Cable Trays and Reels
