

What kind of cable looks best for cable trays

AI Overview

Type TC (Tray Cable) and TC-ER (Exposed Run Tray Cable) are generally the best choices for cable tray installations due to their durability, UL listing, and compliance with NEC standards.

Overview of Tray Cables

Tray cables are multi-conductor cables designed for installation in cable trays or raceways without additional conduit. They are built to withstand mechanical stress, exposure to moisture, heat, oil, sunlight, and chemicals, making them ideal for industrial, commercial, and utility environments. Tray cables simplify wiring by providing insulation, shielding, and mechanical protection in a single assembly, reducing installation and maintenance costs.

Common Types of Tray Cables

- Type TC (Tray Cable)
 - Rated for 600 volts (some versions up to 1000V or 2000V)
 - Suitable for power, control, lighting, and signal circuits
 - UL listed and compliant with NEC Article 336
 - Can be used in industrial plants, commercial buildings, and hazardous locations
 - Available in VNTC (Vinyl Nylon) and XHHW (Cross-linked polyethylene) variants
- Type TC-ER (Tray Cable - Exposed Run)
 - Designed for short exposed runs up to 6 feet between the tray and equipment...
