

What kinds of machines are used for producing butterfly-shaped optical cables

Overview

Key optical fiber manufacturing equipment includes drawing towers for creating the fiber, coloring and buffering lines for protection and identification, stranding machines (like SZ stranding lines) to assemble the cable core, and jacketing lines to apply the final protective. Key optical fiber manufacturing equipment includes drawing towers for creating the fiber, coloring and buffering lines for protection and identification, stranding machines (like SZ stranding lines) to assemble the cable core, and jacketing lines to apply the final protective. The invention relates to the field of optical cable production, in particular to a butterfly-shaped optical cable production device which comprises a pay-off mechanism, an extrusion mechanism, a cooling and drying mechanism and a traction device which are sequentially arranged, wherein the. Optical fiber and cable manufacturing equipment is designed and made for the production of optical fiber and cable products. It is an essential equipment for the production of optical fiber and cable. We offer complete fiber optic cable (FOC) manufacturing solutions, from fiber to finished cable, as well as individual solutions for the individual process steps of fiber optical. Nextrom offers the most comprehensive range of production solutions for all types of fiber optic cables imaginable. We provide Fiber Optic Cable lines that are specifically designed to complement each process step from start, all the way to the desired finished product. This allows our customers to. Optic Cable Outer sheathing Extrusion Production Line for Butterfly-shaped Fiber Optical cables^ It is used to produce butterfly-shaped optical cables, and the sheath material is LSZH low-smoke halogen-free fuel resistance.
