

What router is best for a 20Mbps fiber optic internet connection

Overview

The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. After providing you with the general image about the eight best routers for fiber internet, I decided to compile a comparison table. This table should be useful so you can compare each of my top picks and see the differences in their features, price, and suitability. After conducting thorough tests for over two months, only 7 models made the cut based on multiple parameters. Reliable connectivity, swift downloads, and strong coverage are within.
