

What router is needed for SC fiber optic internet

Overview

You don't need a special router, per se, but you do need one that can handle the speed fiber provides. If you're paying for gigabit fiber service, make sure your router supports at least gigabit Ethernet ports and dual-band or tri-band WiFi (like WiFi 5 or WiFi 6). What kind of router is needed for fiber internet?

Is a fiber router worth the cost?

A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. I worked with the Cybernews research team to review and compare different routers and give. These are routers designed to work with the fast speeds and other advantages fiber internet brings to the table. These link multiple nodes to blanket your home in strong, reliable WiFi coverage, eliminating dead zones. After testing dozens of routers specifically for fiber connections, I've found the ones that actually deliver on the promise of high-speed internet.
