

What to do if there is no outdoor optical distribution box reserved

Overview

Here's a step-by-step guide to help you set up your fiber distribution box seamlessly: Before installing the fiber distribution box, ensure that your optical cables are properly prepared for connection. Before troubleshooting your ONT, we recommend checking for an outage in your area and restarting your router. If that does not resolve your internet issue, you can follow these instructions to check the power to, or restart, your ONT. Not sure if you have an ONT?

The video below can help you. Concerns go from laying cable, splicing and installing/provisioning networking equipment to the issues of getting the PON connection to the customer premises and connecting customer devices - while making a positive impression on the customer. Distribution boxes are especially essential for FTTH networks, where they enable the efficient connection and management of optical fibers from a central.
