

Where are communication towers located

AI Overview

Communication towers, including cell towers and antennas, can be located using interactive maps and databases that provide detailed information on their positions, ownership, and specifications.

National and Interactive Maps

Several platforms allow users to search for communication towers across the United States:

- Tower Maps offers a comprehensive database of cell towers and wireless antenna sites, providing accurate and current locations nationwide .
- AntennaSearch allows users to find towers and antennas by address, city, or zip code, including details on ownership, frequencies, and co-located antennas .
- Cell Tower Maps provides an interactive map of over 2.8 million towers, including 5G, 4G/LTE, and 2G/3G towers, with carrier information and distance calculations .
- SCADACore United States Cell Tower Map features over 25,000 locations with tower and radio information, useful for network planning and troubleshooting .
- MapLarge FCC Tower Map visualizes FCC-registered towers across the U.S., allowing filtering by height or address .

State and Local Resources

- Washington State DNR Communication Sites lists over 100 wireless telecommunication sites on state trust lands, including hilltops and mountaintops ideal for coverage. The program provides leasing opportunities for new or co-locate...
