

Where is the Indonesian Internet Data Center

AI Overview

Indonesia's Internet Data Center market is rapidly expanding, with Jakarta and Batam as primary hubs, driven by cloud adoption, digital transformation, and hyperscale investments.

Market Overview

The Indonesia Internet Data Center (IDC) market was valued at USD 2.74 billion in 2024 and is projected to reach USD 6.99 billion by 2032, growing at a CAGR of 11.59% . The market is fueled by accelerating cloud adoption, AI integration, edge computing, and increasing demand for secure, low-latency data storage across industries such as telecom, BFSI, e-commerce, and media . Jakarta dominates due to its advanced connectivity, enterprise concentration, and reliable power infrastructure, while emerging regions like Surabaya, Batam, and Medan are attracting new investments .

Key Locations

- Jakarta: Largest cluster with over 50% of Indonesia's data centers, mature fiber networks, and submarine cable landing points . Ideal for enterprise colocation, fintech, and cloud providers.
- Batam: Proximity to Singapore, SEZ incentives, and strong subsea cable connectivity make it a strategic hub for hyperscale and regional cloud operations .
- Karawang & West Java Industrial Corridor: Emerging hyperscale zone with large in...
