

Where to cut the cable tray

Overview

The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter. Since the jaws of the bolt cutter drags a layer of zinc across the cut end and forms a protective layer. Inadequate cuts can lead to structural weaknesses, cable damage, or safety hazards. Cutting may be required to: Adjust length. 80 All dimensions are nominal. See product cut she Developed by Interstates, this cable tray cutting guide acts as a guide for a metal cutting circular saw for cutting the side rail of a cable tray as well as a guide for drilling the connecting holes in the cable tray. As well as, learn about what's important to consider before you start cutting, what tools we recommend and after treatment of products.
