

Which fiber optic fusion splicer vendor would you recommend

AI Overview

Top fiber optic fusion splicer brands include Fujikura, INNO, Sumitomo, KOMSHINE, and Comptco, known for precision, reliability, and advanced features.

Leading Brands and Models

Fujikura Fujikura is widely regarded as the industry standard for professional-grade fusion splicers. Models like the FSM-90S+ offer core alignment technology, fast splice times (around 7 seconds), and low splice loss (~ 0.02 dB). They are ideal for backbone networks, FTTH, and mixed fiber types, providing consistent performance even under challenging conditions . INNO INNO splicers, such as the View 8+, are known for user-friendly interfaces, portability, and durability. They support both single and ribbon fiber splicing, making them suitable for field installations and high-density environments. INNO devices often include smart features like automated calibration and mobile app integration . Sumitomo Sumitomo's Type-72C+ series is recognized for high precision and rugged design, suitable for long-haul and industrial applications. These splicers provide reliable core alignment, fast heating cycles, and robust battery life, making them a preferred choice for demanding projects . KOMSHINE KOMSHINE offers models like the FX39 6-Motor and EX39 Mini, which balance affordability with professional performance. They feature multi-motor core alignment, low splice loss, and compact designs, making them suitable for both FTTH and small-scale network deployments . Comptco Comptco splicers, such as the AUA-70F, integrate 6-motor precision alignment, touchscreen operation, and built-in OPM/VFL. These all-in-one workstations are ideal for high-volume splicing tasks, offe...
