

Which industry chain do optical modules belong to

AI Overview

The optical module industry chain spans upstream optical chips and components, midstream module manufacturers, and downstream optical communication equipment integrators, with leading companies including Innolight, Eoptolink, Accelink, Huagong Tech, and TFC.

Industry Chain Overview

The optical module industry chain is structured into three main segments:

- **Upstream:** Focuses on optical chips, photonic components, and PCBs. Key players include Yuanjie Semiconductor, Shijia Photonics, and Guangxun Technology, which provide high-speed optical chips and passive photonic components for 25G, 100G, 400G, 800G, and emerging 1.6T modules .
- **Midstream:** Comprises optical module manufacturers that integrate chips and components into transceivers. Leading companies are Zhongji Innolight, Eoptolink, Accelink, Huagong Tech, and Linktel, producing high-speed modules for data centers, telecom networks, and 5G applications .
- **Downstream:** Includes optical communication equipment providers and data center operators that deploy modules in networks. This segment benefits from high-speed modules for cloud computing, backbone networks, and broadband access .
