

Which router uses fiber optic

AI Overview

Routers compatible with fiber optic internet include high-performance models like the NETGEAR Nighthawk RS700S, TP-Link Archer AX21/AX55, and Ufiber UF-WiFi6, designed to handle gigabit speeds and modern Wi-Fi standards.

Key Considerations for Fiber Routers

Fiber optic internet delivers extremely high speeds and low latency, so not all routers are suitable. When choosing a router for fiber, consider:

- Gigabit Ethernet Support: Essential for handling the high bandwidth of fiber connections .
- Wi-Fi Standards: Wi-Fi 6 (AX) or Wi-Fi 7 (latest) ensures maximum wireless performance .
- Coverage and Range: Dual-band or tri-band routers with strong antennas provide reliable connectivity across large homes or offices .
- LAN Ports: Multiple Ethernet ports allow wired connections for gaming consoles, desktops, or smart TVs .

Recommended Routers

- NETGEAR Nighthawk Tri-Band WiFi 7 Router (RS700S)
- Supports Wi-Fi 7 for ultra-fast speeds up to 1,900 Mbps.
- Equipped with a 2.6 GHz quad-core CPU, 2 GB RAM, 10G LAN/WAN ports, and four 1G LAN ports.
- Ideal for gaming, streaming 4K/8K content, and large offices
